

Grant proposals (non research)

Prostate Cancer Foundation BC is now offering grants of up to \$25,000 for Prostate Cancer survivorship programs. These grants are to be used to fund Prostate Cancer survivorship programs or research which provide support, education or awareness to Prostate Cancer survivors and their families.

If you have an idea for a project that would help Prostate Cancer survivors and their families, we would love to hear from you. This opportunity is open to interested parties anywhere in BC. The following requirements will apply.

- A description of the project and funding required
- A detailed plan of how it will be carried out
- The amount of time it is expected to last
- The people to be hired and their anticipated salaries
- The equipment to be purchased or leased and the cost
- The anticipated outcome or results

We look forward to hearing your ideas and will be pleased to have an informal discussion to help you structure your thoughts before applying. Please contact the foundation office for further information.
